

Instructions for installing the ELECTRA Plugin for EAGLE

1. Upon launching Eagle, you'll see the **Control Panel**. Open **Scripts > Eagle.scr** and add the following line to the **MENU** area in the **BRD** sections (see example here):

2. Under your ELECTRA installation directory there is an Eagle subdirectory that contains two files that need to be copied under the following Eagle directories:
 1. In the Eagle application directory, open the **ULP** folder and save the **pcb_to_dsn.ulp** file coming from your ELECTRA installation directory under Eagle subdirectory.
 2. In the **BIN** folder, save the **electra.png** icon

When opening an Eagle Board, you should now see the icon  **AROUTE** in your toolbar, as shown below:
